SIEMENS PLC & HMI based Automation Projects modification, commissioning, FAT

Micro-controller based Automation Product Design & Development

Bosch Ltd

Student project

September 2009 - February 2010 (6 months)

It is a project on TPM which will be Automated Maintenance of CRI ATMO line2, station 40, in Bosch Ltd. Nasik. We've designed temperature indicator with data logger, records in various timing as desired on Chiron machines in Bosch Ltd similarly implemented belt cleaning system, on ATMO station-40 to protect conveyor belt from rusting and droplets of oil over it.

Engine Nozzle Valve part Grinding and Finishing (Bosch Ltd)

Bosch manufactures the Engine nozzle vale part, we provide automation work bench to grind and finish the Valve Part

Microcontroller based Robots for IIT competitions.

It follows the path of line as well as detects the wall and grids. Used in robotic competitions and to convey the materials from one place to desired.

Education

NDMVP's College of Engineering

BE Instrumentation & Control, Industrial Automation · (2007 - 2010)

SMES Polytechnic

Diploma, Electronics and Telecommunication · (2004 - 2007)

CDO MERI Highschool

10th, High School/Secondary Certificate Programs · (1994 - 2004)
